

Task 1

Get the USD To EUR Exchange rate from this web service

<https://api.ratesapi.io/api/latest?base=USD&symbols=EUR>

and then use it to make a software that takes amount of USD Dollars from the user and calculate how much will it cost in EUR.

Task 2

Use this web service

http://api.weatherstack.com/current?access_key=cce43aa3a3de500cc32c5df0e67c9408&query=Cairo

and make a program that works for 10 times to get the weather, humidity, visibility, pressure, wind speed and save them in CSV file.
